

Decadent Brownies

WAY better than a box mix. Only uses one bowl, no mixer required.

5 tablespoons (71 grams) unsalted butter

1 1/4 cups (249 grams) granulated sugar

2 large eggs plus 1 egg yolk, cold

1 teaspoon vanilla extract

1/3 cup (74 grams) vegetable oil (or any neutral flavored oil)

Instructions

Preheat oven to 325°F. Line an 8 by 8-inch metal pan** with foil or

parchment paper and create a “sling” with over hang . This will help with removal. Spray with nonstick cooking spray.

To double this recipe, use a 9×13 pan, adding a few minutes to the baking time.

Add the butter to a sized microwave-safe bowl. Microwave for about 1 minute, or until the butter is melted. Transfer to a mixing bowl and add the eggs and egg yolk, whisking vigorously

for 1 minute. Whisk in the vanilla and oil.

With a rubber spatula, stir in the Brownie mix. Mix until well combined. Stir in any extra add-ins, if using.

Pour brownie batter into the prepared pan and spread evenly. Place in the oven and bake for 30 minutes, or until the brownies are set (use a cake tester, thin blade knife or toothpick inserted into the center. Should see moist crumbs attached, not wet batter). Do not overcook.

Serving: Brownies will be gooey when served warm, chewy at room temp, and fudgy when served chilled.

For best texture and taste, allow the brownies to cool to room temperature fully before slicing and serving.

Storing: Room Temperature & Fridge: Store in an airtight container for up to 3 days at room temperature or up to 5 days in the fridge.

Freezer: Wrap the cooled whole slab or individual slices of brownies in plastic wrap and place inside an airtight container. Store in freezer for up to 3 months. Thaw overnight in the

fridge, or for a couple hours at room temperature, before serving.

******A metal pan is best. Glass and ceramic conduct heat more slowly than metals (the edges will dry out and the center will take longer to bake fully). If glass/ceramic is all that is available, increase the baking time anywhere from 5-10 minutes.
